Referral Letter for ACE Environmental Solutions (Pty) Ltd

To whom it may concern,

Atlas Tower hereby confirm that Ace Environmental Solutions (Pty) Ltd (hereinafter referred to as "ACE"), is an active Site Acquisition Consultant on a couple of Atlas Tower projects.

The scope of work that Ace has done for Atlas Tower is as follows:

- Engaging and signing leases with land lords where Atlas Tower will be able to construct telecommunication towers;
- Preparing, submitting and obtaining all relevant approvals necessary for Atlas Tower to construct a telecommunication tower at a specific location. These approvals include, SACAA approval, EIA non-listing letters, Building Plans and/or Consent Use and/or Building Line Relaxation approvals, and any other that is required; and
- ACE also assist Atlas Tower with Basic Assessment Reports where Department of Rural Development and Land Reform did not issue an EIA non-listing letter, but instead requested a full Environmental Assessment is needed.

I can strongly recommend ACE as a trust worthy company that is dedicated, hardworking, knows the system and is always available and whiling to go the extra mile. ACE is also a company with educated personnel with a lot off integrity and ethic morals.

I am full of confidence that ACE can make a success and over come any obstacle given to them.

Regards
